

KRANTHI KUMAR REDDY ANNAPUREDDY – FULL STACK DEVELOPER

Halifax, Canada | kranthia24@gmail.com | +1 (782) 882 7765 | [GitHub](#) | [LinkedIn](#)

PROJECTS

Portfolio Website

JUN 2025 - PRESENT

Tools: PostgreSQL, VS Code

- Automated **CI/CD** using **GitHub Actions**, reducing develop to deploy time by 80%.
- Deployed a **Dockerized API**, powering an Angular application with live data.

Trade Connect and Processing (TCP)

OCT 2020 - PRESENT

Tools: MySQL, IntelliJ, Eclipse, Postman

- Built a complete **OAuth2 security** framework including authorization server, client and resource server, leveraging custom **JWT** tokens to secure APIs and manage users.
- Upgraded session-based to JWT-based authentication, creating a **STATELESS**, microservices-friendly security system integrated with an front end application.
- Designed and developed backend **APIs** for **Job Scheduling**, **Email Notifications**, and **File Generation**, supporting core application services.
- Integrated **RESTful APIs** with Angular application, enabling seamless data flow and real-time updates for end-users.

EDUCATION

Master of Engineering in Internetworking

SEPT 2023 - MAY 2025

Dalhousie University, Halifax, NS

- Relevant Courses: Programming in Internetworking (Python, Docker, CI/CD pipelines).

Bachelor of Engineering in Electrical and Electronics Engineering

JUN 2016 - SEPT 2020

Anna University, R.M.D. Engineering College, India

- Relevant Courses: Object Oriented Programming (C, C++, Java languages and Algorithms).

EXPERIENCE

Remote

SEPT 2024 - PRESENT

Full Stack Developer

- Migrated legacy **Monolithic application to RESTful Microservices architecture**, reducing deployment time by 40% and improving system scalability.
- Developed and maintained **Apache Kafka-based** event-driven systems, enabling real-time data streaming and reducing message processing delays by 25%.
- Integrated and customized **DataTables** within Angular applications, enabling advanced features such as pagination, sorting, and filtering, which improved data accessibility for 500+ end users.
- Collaborated with **UI/UX teams** to translate wireframes and business requirements into intuitive, user-friendly web interfaces.
- Documented **Module Federation** based **Micro Frontend architecture** for an Angular application, providing guidelines for integration, configuration, and module sharing across applications.

SoWeDid Software Solutions, Hyderabad, India

OCT 2020 - MAY 2023

Software Developer

- Refactored outdated codebases to adopt modern frameworks and design patterns, enhancing maintainability and reducing technical debt.
- Maintained session-based authentication using **Spring Security and HTTP Sessions** and login workflows with an **Angular application** for secure user access.
- Built and optimized **Elasticsearch queries and indexes**, reducing search response time by 30% and supporting faster data retrieval across applications.
- Designed and optimized **BIRT reports**, improving performance and delivering insights to 100+ business users with reduced report generation time.
- Implemented reusable Angular components and services, streamlining development and reducing code duplication across modules.
- Documented **Liquibase** workflows and best practices, making it smooth on-boarding for the new team members and improving database release cycle by 25%.
